Excerpt: . . . 100 h. p. motors and generators, and were afraid that the machines would be burned out if more than 200 h. p. were transmitted. This is the greatest drawback of these tests, namely the limitation of the equipment. Mr. W. P. Flint: It looks to me that you would not have done very much violence to your data if you had used a continuous band to represent both the single and multiple rope tests. The Author: I tried to refrain from doing violence to somebody else's work, but give the data as I found them. Mr. Waltier Riddle: I would like to know a little more about the rope used in these tests. The Author: That should have been stated. The ropes used in the German test were good American hemp ropes from the Philippine Islands and the rope which we used at the Carnegie Technical Schools was supposed to be of the same nature. If a representative of the Dodge Mfg. Co. is here, he could easily confirm or deny it. Was that good Philippine Island hemp, Mr. Rose? Mr. T. L. Rose: The rope in question was considered a high grade hemp rope. The Author: I believe there is a continuous rope drive at the plant of the Sheet and Tube Company, in Youngstown. I know that there is a rope drive and I am almost sure that it is continuous. I have seen it in operation and it seems to work well....
