

Hydrology of Disasters: Proceedings of the World Meteorological Organization Technical Conference Held in Geneva, November 1988

By Dr O Starosolszky

Routledge. Hardcover. Book Condition: New. Hardcover. 328 pages. This timely book reviews the hydrological aspects of different types of disaster and considers measures required to protect people and property against such events as well as disaster prediction, forecasting and monitoring. Its publications coincide with the start of the United Nations Decade for Natural Disaster Reduction. It comprises twentyseven papers by experts from a wide range of countries and organizations presented at the Technical Conference convened by the World Meteorological Organization in Geneva in November 1988. The contributions are grouped into five sections covering hydrological problems of extreme floods and droughts, consequences of accidental water pollution, hydrological problems of dam and levee rupture, hydrological consequences of volcanic eruptions and hydrological consequences of earthquakes, landslides and avalanches. By drawing together work on a wide range of hydrological problems, this book is a valuable reference source for all scientist, engineers and policy- makers whose work touches on this diverse field. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Hardcover.

Reviews

A whole new electronic book with an all new perspective. It is one of the most incredible book we have read. Your way of life span will likely be convert when you comprehensive reading this article book.

-- Spencer Fay

Very helpful to all of class of folks. This is certainly for all who statte there had not been a worthy of studying. Once you begin to read the book, it is extremely difficult to leave it before concluding.
