# Theoretical astronomy relating to the motions of the heavenly bodies revolving around the sun in accordance with the law of universal gravitation, . of the geocentric and heliocentric

By James Craig Watson

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 134 pages. Dimensions: 9.7in. x 7.4in. x 0.3in.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1885 Excerpt: . . . n, n, n, and n are obtained, to compute from these and the data furnished directly by observation the curtate distances for the extreme places. The corresponding heliocentric places may then be found, and hence the position of the plane of the orbit as determined by the first and fourth observations. Thus, by means of the equations (37) and (38), we obtain log P 0. 0256953, log p 0. 4492542. With these values of p and p, the following heliocentric places are obtained: I 71651. 54, log tan b 8. 4289064, logr 0. 3083732, f 91 37 40. 96, logtan6 8. 8638549, logr 0. 3172678. Then from tan t sin (i. ( I)--SI) (tan V tan b) sec (f--1), tan i cos (i (1 1)--Si) (tan b--tan 6) cosec--I), we get SI 206 42 45. 23, i 4 36 49. 76. For the arguments of the...

## Reviews

These kinds of ebook is almost everything and got me to seeking ahead of time plus more. It really is filled with wisdom and knowledge I discovered this book from my i and dad advised this publication to learn.
-- Sonny Bergstrom

This pdf is fantastic. This really is for all who statte there was not a worth looking at. Your lifestyle period is going to be convert the instant you complete looking over this pdf.
-- Dr. Chaim Kub
